Customer Support Services

Lexmark offers a wide variety of product support services to ensure end users are able to generate hardcopy output all of the time. We provide this focused, comprehensive, end-to-end service process from our national service centre of excellence.

Service Packs

Lexmark Service packs provide base service elements for customers who need reliable, efficient maintenance coverage. They can be purchased at any time during the initial warranty period and ensure support for up to an additional four years.

Printing Support Agreements

Lexmark's Printing Support Agreements (PSA's) enable organisations to create a service agreement to match their own specific support requirements. Lexmark is able to accommodate the following variables under any individual agreement.

- Hours of Service (including weekend service)
- Service Level Agreements
- Performance statistics
- Co-terminus and variable term contracts
- Training and installation

Forms Management

Print on Demand

Lexmark can help you eliminate the majority, if not all costly pre-printed forms giving you the opportunity to save significant money and speed up your business.

From retail chains to higher education, banks to insurance companies, all organisations are using forms to drive business practices. These forms are often costing more than they should due to storage, obsolescence and even lost business due to delays in printing.

Our Print-on-Demand offerings will help you convert pre-printed form into e-forms which will allow you to print and update these when needed from a central location. The solution can also provide the ability for end-users who do not have access to a PC to view and print these forms straight from the output device. How many forms can we eliminate for you?

Lexmark Document Portal

This customisable print-on-demand software utilises distributed Lexmark MFP's and user workstations as a "Portal" to the electronic documents stored on the Portal Server. This creates a virtual document file cabinet where users can find, view, fill, distribute or print up-to-date documents at their location.

Lexmark ImageQuick Card

Using the ImageQuick™ Card, you can store forms or critical documents on a Web site or central server and print them on demand using the most up-to-date version. The ImageQuick option is compatible with most document image formats helping to increase the productivity of your office by providing an easy, fast way to print archived files or directories of manuals, images, engineering drawings or other files without using an application or a printer driver.

Forms Management

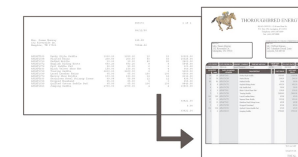

Electronic Forms

Utilising Lexmark's Electronic Forms solutions you can create "intelligent" paper documents that will not only assist in automating business processes but also create functional, professional looking documents as well.

This offering includes:

- Intelligent merging of data onto printed or non-printed documents
- Adding of bar codes and enhancing of existing printed output with fonts and logos without changes in the host datastream.

A great solution to enhance ERP systems print output that frequently suffer from poor print formatting without affecting the ERP system implementation.

Lexmark Document Producer

Lexmark Document Producer is a server-based electronic forms solution that offers creation of sharp, professional looking electronic forms. Built-in e-mail, fax and archiving functions allow extended function beyond that of just printing created documents. Integration with Lexmark Document Distributor automates virtually any business process, saving time and money.

Lexmark OptraForms™

Optra Forms™ is a printer-based batch document formatting and electronic forms printing solution from Lexmark. Optra Forms consists of five easy-to-use programs (Design, DataMap, Style, Manager, Optra Forms Web Filler / Filler for Windows) and an Optra Forms flash memory or hard disk option installed in Lexmark laser printers. Forms, fonts, and all formatting information are stored in the printer. Host data sent to the printer is reformatted, positioned on the page, converted to bar codes if required, and merged with the form or page as it prints.

The combination of the printer's processing power and the powerful Optra Forms Merge program, stored in the printer, creates an elegantly simple solution for electronic forms or formatted batch documents on-demand.

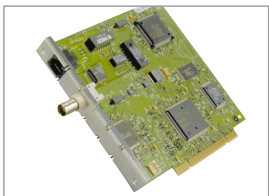

Connectivity and Application Solutions

Print Servers and adapters

Lexmark offers a complete line of print servers and adapter to provide reliable, trouble-free performance in all major network printing environments.

MarkNet Internal Print Server

Internal Print Servers such as the MarkNet N2000 Series and MarkNet N2100 Series provides an easy way to extend the capabilities of a base model printer. These print servers offer the greatest throughput capabilities of all optional Lexmark networking products. By adding an internal print server to select model printers, you can now access the printer from anywhere on your network.

MarkNet External Print Servers

External Print Servers such as the MarkNet X2000 Series offer the greatest compatibility of any print servers offered by Lexmark. These print servers provide investment protection by allowing connections to any supported printing product.

802.11b Wireless adapter

External Adapters such as the N5 wireless adapter and the 802.11b Wireless Print Adapter provide flexible alternatives to today's wired network adapters. These wireless adapters allow users to place conventional printers in places previously not possible due to challenging architecture and economic barriers.

Application Solutions

Lexmark understands that special printing needs require specific printing tools, so we have developed a range of application solutions to suit your business needs.

Barcode printing

The **Lexmark Bar Code Card** supports more than 47 industry standard, algorithmically generated one-and two-dimensional bar codes including MaxiCode and PDF417 for use in business applications. Use Lexmark Visual Bar Code Designer to easily generate the PostScript and PCL data.

IBM Mainframe/AS400

With a **Lexmark Card for IPDS** and SCS/TNE option, use your printer for both network printing and for IBM iSeries, AS/400 or mainframe jobs. Print bar codes, forms, publications and graphics closer to your end users giving you the associated cost and time savings from true distributed printing. So now direct your IBM AFP/IPDS or SCS output across the LAN using the TCP/IP protocol.

Secure Printing

The **Lexmark PrintCryption Card** is an option for the Lexmark T series of output devices that enables the printing of host-encrypted data. With this option installed, the printer is capable of decrypting print jobs encrypted with the AES Rijndael algorithm. The Lexmark PrintCryption Card analyses the encrypted data stream, determines if the correct key was used to encrypt the data, decrypts the data and allows the confidential document to be printed.

Document Workflow Solutions

Lexmark Document Solutions Suite is a range of software solutions designed to minimise expense and inefficiencies of manual and paper based processes. The suite of solutions offers distinct document solutions that empower users with comprehensive but easy-to-use electronic information-management tools.

These are flexible, adaptable, practical solutions designed to fit with your business.

Lexmark Document Distributor

Lexmark Document Distributor is a flexible document-routing application that automates manual processes by giving users the power to scan, fax, copy, print, e-mail or archive from the push of a button.

- Includes dynamic prompting
- Provides easy-to-use effort proof automation
- Routes information to multiple destinations such as email addresses, fax machines, printers, multifunction devices and storage systems
- Easily indexes and archives information.

Lexmark Document Producer

The Lexmark Document Producer is a server-based electronic forms solution that offers creation of sharp, professional looking electronic forms. Built-in e-mail, fax and archiving functions allow extended function beyond that of just printing created documents. Integration with Lexmark Document Distributor automates virtually any business process, saving time and money.

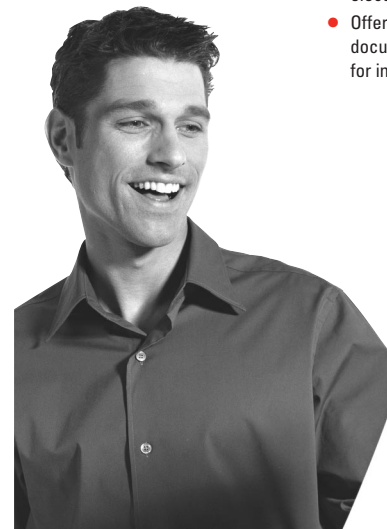

- Eliminates obsolete pre-printed forms
- Reduces forms storage and handling costs
- Creates professional quality electronic forms
- Offers print on demand or document routing capability for increased efficiency

Lexmark Document Portal

This customizable print-on-demand software utilises distributed Lexmark MFP's and user workstations as a "Portal" to the electronic documents stored on the Portal Server. This creates a virtual document file cabinet where users can find, view, fill, distribute or print up-to-date documents at their location.

- Provides fast and easy access to electronic forms, brochures and other documents
- Reduces form storage, waste and handling costs
- Offers print on demand or document routing capability for increased efficiency
- Auto-populates documents from a database or prompts directly onto the Lexmark multifunction device.

To see how Lexmark Document Workflow solutions can help your streamline your business contact Lexmark on 08704 440044

Colour Page Printers

Lexmark C720

The Lexmark C720 colour laser printer gives high performance, photo quality laser printing for the busy workgroup. The standard model comes with 32MB memory, while the network model comes with 64MB and a 10/100BaseTx network card. The C720dn model includes a 128MB, duplex unit and an additional 500 sheet paper tray.

Lexmark T420d

The Lexmark T420d is a general purpose laser printer with network capability, a space saving design and ease of use for workgroup printing. Along with the network ready model, the standard automatic duplex feature offers convenience, flexibility and paper savings. Versatility is increased with the addition of either a 250 sheet or 500 sheet drawer.

Lexmark W

Lexmark W812 provides fast and affordable A3 printing, all in a small footprint. At 26 ppm and an 8 seconds time to first print, your printing will be ready when you want it to be. Combine this with a high yield print cartridge and your printing costs are reduced by this exceptional mono printer.

The Lexmark W820 is the highest speed, high volume, wide format network printer in the Lexmark printer range. At 45ppm, with less than 5 seconds time-to-first-page, as well as high capacity document finishing, it is function rich and versatile for demanding departmental printing.

MFP Installation Packs*

The Standard MFP Installation Pack

The standard installation pack offers you a smooth delivery and assembly of your MFP device in a fast and methodical way, saving you valuable time. With this pack our trained service engineers will take care of all the activities that will prepare the machine for final configuration. Lexmark will assist in the unpacking and placement of the product, install the hardware and perform a function check on all the hardware installed.

Standard Installation Packs	Part No.

The Pro MFP Installation Pack

The Lexmark MFP is not only designed to produce paper, but also to remove paper by digitalisation, to integrate with your core applications and to send documents to Email and fax destinations. This Pro MFP installation pack is designed to give you quick and easy access to the four main functions of the Lexmark MFP: Printing, Scanning, Copying and Faxing (that are all available out of the box). The Pro pack includes the hardware installation of the machine, and additionally prepares the MFP, so your end-users can quickly start using the MFP to add value to your business processes. Our service engineers will take care of all the installation and set up activities on the machine, the server and the clients can configure the machine so it is ready to use.

Multifunction Printers

Lexmark makes it easy to boost office productivity with network multifunction solutions. They eliminate the need for separate printers, copiers, fax machines and scanners by converging multiple office technologies into a single unit. Because they're based on Lexmark's award-winning laser network printers, your multifunction solution will connect to your network as easily as a network printer. With an easy to use operator panel that gives you quick and easy access to every powerful function, Lexmark multifunction printers give you the power and flexibility that is required by business today.

Forms Printers

Lexmark's comprehensive range of forms printers consists of both 9 pin and 24 pin printhead technologies available in both wide and narrow format. To complete the range is the 4227 plus which is a 9 pin, wide carriage, high performance printer capable of printing 720 CPS. This is a range that will be compatible with most customer environments.

OptraForms, SIMMS and DIMMS

The days of preprinted forms are numbered. Today it makes far more sense to print forms on demand. Making the move from preprinted forms to electronic forms is easier and more affordable than ever. OptraForms maximises your printer investment by letting you use the same printer for your electronic forms as well as other types of printing. Designed to work with the latest range of Optra printers. OptraForms gives you the performance and versatility you would expect from Lexmark.
