

NP 7130 SERIES

Canon

two small **business**
investments
that **give**
immediate
returns.

You'll immediately become more productive with the NP 7130 Series, two easy-to-use copiers that **eliminate warm-up time** and deliver Canon's acclaimed quality and reliability at **13 copies per minute**. The **ENERGY STAR® compliant** NP 7130 Series provides you with a dependable and cost-effective solution to producing great-looking copies — all with desktop convenience.

The NP 7130 Series engine uses Canon's advanced technology to give you high reliability, low maintenance and the flexibility to handle your varied copying needs — from **enlargement and reduction** to copying onto legal-sized or specialty papers. The NP 7130F comes equipped with an **Automatic Document Feeder** with exceptionally reliable document-handling technology for fast copying of multipage originals.

Like all Canon NP copiers, the NP 7130 Series is backed by the nationwide Canon Dealer Network. It's your added assurance that a small investment in an NP 7130 Series copier will reap big returns for years to come.

NP 7130 SERIES

immediate convenience.

Copying is incredibly simple with user-friendly LED indicators on the control panel. Easily **reduce or enlarge images from 70% to 141%**, in increments of one percent, with the built-in **Zoom Mode**. For added convenience, four of the most common reduction and enlargement sizes are preset. **Automatic Exposure** ensures clear copies by automatically selecting the correct density setting for difficult-to-copy originals such as newspapers, blueprints or originals on color paper.

Automatic Exposure makes superior copies from difficult-to-copy originals.

ENERGY STAR® The Symbol for Energy Efficiency

Wide Range Zoom makes it easy to control the image size.

ENERGY STAR® compliant.

The NP 7130 Series conforms to all EPA standards, making it ENERGY STAR® compliant. The award-winning **RAPID Fusing System™** Technology and **Auto Power-Off** feature reduce energy consumption, while Canon's charging roller system virtually eliminates indoor ozone pollution.

The NP 7130 Series' streamlined Control Panel is easy to read, making copying fast and simple.

Canon

reliability

protects

your

investment.

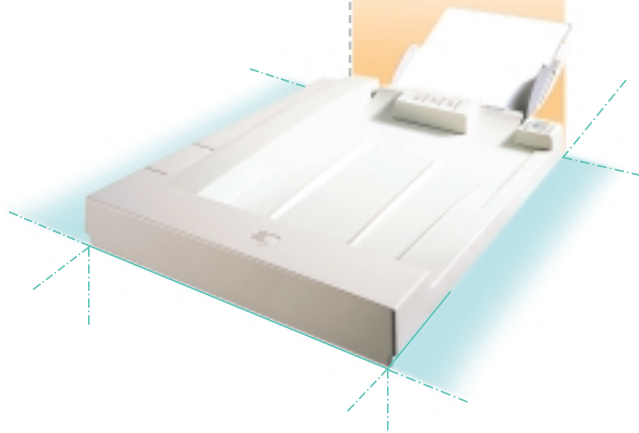

Your business needs performance you can rely on. At the heart of the NP 7130 Series there is a durable Canon engine, built for simple maintenance and years of dependable performance. The clamshell design allows you easy access to the paper path. The **NP 7130 Drum Unit** yields a remarkable 30,000 copies before it needs replacing. The **high-yield Toner Cartridge** also yields an impressive number of high-quality copies, while maintaining an economical cost per copy. Features like these are some of the reasons Canon has been the leader in the U.S. copier market.

The Toner Cartridge is a snap to replace by anyone in the office.

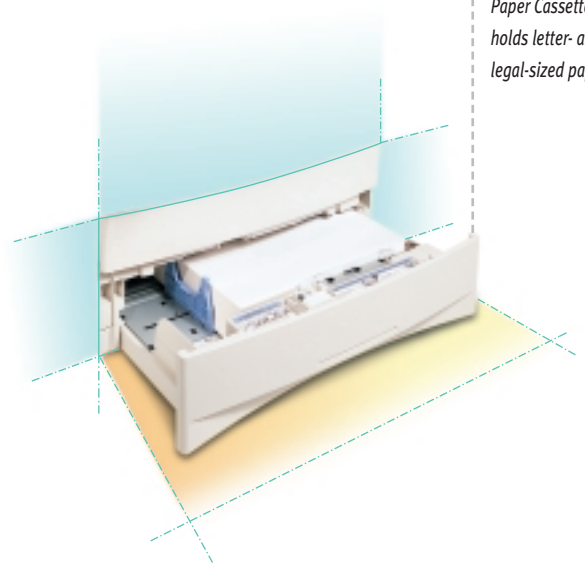

*The NP 7130F's
30-sheet Automatic
Document Feeder
lets you make up
to 100 copies.*

immediate
productivity.

*The 500-sheet
Paper Cassette
holds letter- and
legal-sized paper.*

 Thanks to Canon's patented **RAPID Fusing System™**, warm-up time is eliminated. Turn on the NP 7130 or NP 7130F and you're immediately ready to copy.

A touch of a button selects either of the two paper sources—the **500-sheet Paper Cassette** or the **50-sheet Stack Bypass**. Having two paper supplies available, such as plain paper and letterhead, gives you flexibility once only available from larger copiers.

The **user-adjustable Paper Cassette** holds letter- and legal-sized paper. And the Stack Bypass makes it easy to copy onto a variety of materials, including colored paper, letterhead, labels and transparencies, without affecting your main paper supply.

Copying multipage documents on a compact copier is easier than ever. The NP 7130F's 30-sheet **Automatic Document Feeder (ADF)** feeds statement- to legal-sized originals at the full engine speed of 13 copies per minute. And, unlike the feeders on most small copiers, the NP 7130F has a true ADF that lets you make up to 100 copies of your multipage originals.

The convenient front-loading design, combined with the stationary platen, mean this feature-packed copier takes up very little space.

*The 50-sheet
Stack Bypass is a
convenient way
to copy onto
letterhead or
specialty stocks.*
