

AR-C200P

Digital Color IMAGER Series

SHARP®

High-Quality Color Printing At Your Fingertips!

Single-Pass Color™ Digital Technology:

The Sharp AR-C200P utilizes a straight-through paper path that gives greater paper-handling flexibility—including banner printing—and faster throughput in full color.

Outstanding productivity and cost efficiency that provides a whole new perspective on color printing.

With the AR-C200P Digital Color IMAGER from Sharp, it's easy to have a whole new perspective on office color printing.

Full-color output at 20 pages per minute and monochrome at 24 ppm—on sheets from postcard-size to 8.5" x 47.24" banners allow you to get the job done fast!

You'll love the Sharp Color IMAGER's outstanding features.

The Quality is Brilliant.

The AR-C200P's sophisticated color matching know-how and high-speed color processing technology will get your business documents noticed every time.

Using Single-Pass Color™ technology and improved image processing, the AR-C200P consistently delivers accurate color to the most image conscious customers. Auto Color Balancing ensures that hues stay the same from start up through long print runs, and new automatic color techniques can simulate ink standards, such as SWOP™, Euroscale and popular inks from Japan. For smoother output, refined color screens are used to create brilliant, vivid images, especially on photos.

The Performance is Built In.

A powerful 450 MHz processor means less time waiting for documents to print and

allows you to maximize the performance of your printer and output large documents and complex graphics. The AR-C200P Digital Color IMAGER ships standard with 64MB RAM and can be upgraded to 1 GB RAM. A standard internal 10/100 Base-T print server allows for network connectivity and an optional internal 10 GB hard disk drive augment the AR-C200P IMAGER's document and file storage capabilities.

The Paper Handling is Exceptional.

With a maximum capacity of 1,690 letter/legal size paper, the AR-C200P keeps the user interventions to a minimum. Its Auto Media Detect feature reduces paper selection errors and waste, and a compact automatic duplex option helps to minimize media usage as you print double-sided documents.

The Time is Now.

Now you can save significantly on the cost per printed page with the AR-C200P versus color laser, color inkjet and especially, outside copy services. Further, the cost of a black-and-white page is comparable to that of most mono laser printers—so you can use the Sharp AR-C200P Color IMAGER for virtually all your business printing needs.
