

KONICA MINOLTA

The essentials of imaging

PagePro 1380MF

PagePro 1390MF

Your smart and compact all-in-one

All-in-one 20 ppm

Small in size, **big in performance**

Efficiency is what matters most to you in your professional, streamlined business. And efficiency is what the Konica Minolta PagePro 1380MF and PagePro 1390MF are all about. Combining monochrome laser printing, speedy copying, colour scanning, and – in the PagePro 1390MF – flexible faxing in a single streamlined system, these clever all-in-ones save you having to purchase up to four separate devices. Multifunctionality couldn't be more compact and space-saving! The PagePro 1380MF and PagePro 1390MF bring cost-effectiveness and productivity to your home office or small to medium-sized business.

➔ Up to four functions for less

Buying and operating a single system costs you a lot less than the combined cost that quickly accumulates if you have to purchase up to four individual devices. The PagePro 1380MF and

PagePro 1390MF are excellent examples for such savings. Their long-lasting consumables keep your spending down in the long run. As an added bonus these printers save on space as well – something your home office or small business really benefits from.

Fax	—	x
Automatic document feeder	Optional	Standard

➔ Power, flexibility and quality

With their productive speed of 20 pages per minute, the PagePro 1380MF and PagePro 1390MF manage all your every-day printing and copying with ease. First page-out time is just 17 seconds, while powerful processing means pages are printed fast without compromising on print quality. The PagePro 1390MF gives you the added convenience of a standard 50-sheet automatic document feeder that processes up to 20 originals per minute, making this the perfect device for flexible copying and speedy scanning. At 600 x 600 dpi resolution, both systems impress with superb quality and professional results for printed and copied output. And thanks to 1,200 dpi scan resolution their scans are of excellent quality and beautifully detailed.

➔ Easy to set up, easy to use

The PagePro 1380MF and PagePro 1390MF feature intuitive control panels, high-capacity 250-sheet paper trays and long-lasting consumables that are easy to replace. As part of Konica Minolta's Clean Planet programme for the environment, returning the used toner cartridges is convenient and completely free for you. One huge advantage of both all-in-ones lies in their easy handling: Now, there's only one machine to monitor, maintain and order supplies for.

➔ Comprehensive scanning functionality

Although the PagePro 1380MF and 1390MF are all-in-ones for black&white, with both you can also scan in colour to bring out the most of brochures, photos, magazine pages and so much more.

Making use of the TWAIN scan capability, the standard LinkMagic software provides easy access to the most frequently used scanning applications. LinkMagic lets you scan images and save them to any directory on the hard disk of your computer, for simple and convenient archiving of your paper documents.

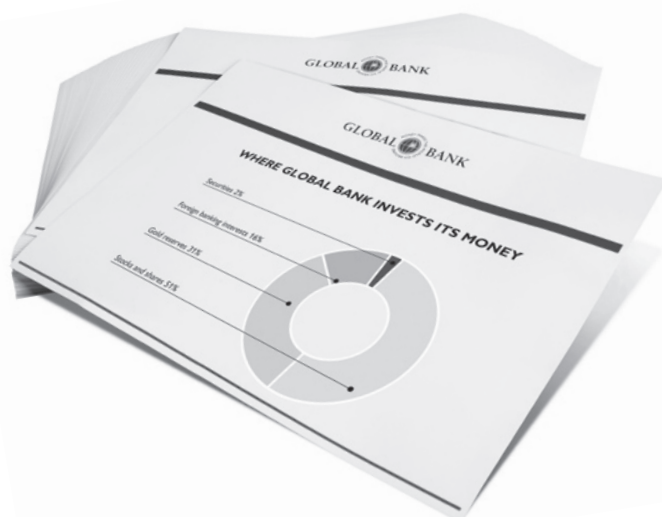

LinkMagic eliminates the need to manually launch specific applications. If required, the software starts your chosen application, for example MS Word, Excel or PowerPoint, creating new documents with your scans. LinkMagic can also automatically launch the email application Outlook Express on your computer, scanning a page or document directly into a new email message as standard attachment. The operation of all these functions is fast, simple and straightforward via the LinkMagic utility.

➔ Extra copying benefits

The PagePro 1380MF and PagePro 1390MF offer a special copy mode to improve the quality of copies. The choice of three settings ensures that originals of any type are copied perfectly, whether they have photos, more text or a mixture of both. Where quality is less important, the toner save button helps you economise, for example for drafts or documents for internal use. Other conveniences include electronic sorting, ensuring the correct output of multi-page originals. With n-in-1 you can print multiple scans, for example all pages from a multi-page brochure, on a single page.

➔ Fast and convenient fax communication

On top of all this, the PagePro 1390MF gives you powerful fax functionality. Featuring a high speed 33.6 kbps fax modem, it is truly fast whether you send or receive faxes. 12 one-touch dials and 100 speed dials save valuable time whenever you need to fax information to multiple recipients or the same destinations.

(within EU; local law applies)

- All specifications relating to paper capacity refer to A4-size paper of 80 gsm quality.
- All specifications relating to scanning, copying or printing speeds refer to A4-size paper that is scanned, copied or printed crosswise in multipage, simplex mode.
- The support and availability of the listed specifications and functionalities varies depending on operating systems, applications, network protocols as well as network and system configurations.
- The stated life expectancy of each consumable is based on specific operating conditions such as page coverage for a particular page size (5 % coverage of A4). The actual consumables life will vary depending on the use and other printing variables including page coverage, page size, media type, continuous or intermittent printing, ambient temperature and humidity.
- Some of the product illustrations contain optional accessories.
- Specifications and accessories are based on the information available at the time of printing, and are subject to change without notice.
- Konica Minolta does not warrant that any prices or specifications mentioned will be error-free.
- Microsoft, Windows and the Windows logo are trademarks, or registered trademarks, of Microsoft Corporation in the United States and/or other countries.
- All other brand and product names may be registered trademarks or trademarks of their respective holders and are hereby acknowledged.
